PSSLD

Message

We are pleased to inform you that the Pakistan Society for the Study of Liver Diseases (PSSLD) will hold its **14th Annual Conference** December 11-13, 2020 Karachi. The theme of the meeting is 'Quick Decisions in Hepatology'. Due to the COVID-19 pandemic, PSSLD Executive Council has decided to have a hybrid meeting this year. It will be an exciting, educational meeting with renowned national and international speakers participating.

We need to make quick and correct decisions while managing our hepatology patients. The postgraduate course on Day 1 will be in line with the theme. The course will be titled, "Making Decisions in Hepatology - Clinical Vignettes", and will include related case histories and relevant discussion. Tips and tricks for impactful research will be discussed in the research symposium for postgraduate students.

The conference will include interactive symposia and lectures on viral hepatitis, NAFLD, autoimmune liver diseases, hepatocellular carcinoma, portal hypertension, liver transplantation and emerging field of endo-hepatology. The meeting's content and activities are tailored to a wide audience of gastroenterologists, hepatologists, internists, general practitioners, and postgraduate students. The faculty will include eminent national and international experts, who will present updates and recent advances, original work, and state-of-the-art lectures. Technical and clinical problems and their solutions will be discussed.

We urge our colleagues to participate enthusiastically and honor us with their presence. We look forward to welcoming you.

Prof. Zaigham Abbas
President PSSLD &
Chair Organizing Committee
